REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of a cylinder lock with a housing (13) with a cylindrical bore, a rotor (17) rotatably mounted in the bore, a plurality of locking bars (16) on the rotor, where each locking bar has a locking bar pin (15) directed radially inward towards the axis of the rotor, and each locking bar is displaceable on the rotor in a direction parallel with the axis and each locking bar is displaceable in a radial direction with respect to the axis, and a combination post (12) arranged along the axis having a plurality of combination holes (20) thereon, where the locking bars are adapted to be displaced by a key in a parallel direction to a position where the locking bar pins are directed towards a combination hole.

The closest prior art of record, U.S. Patent Number 3,404,548 to Keefer, discloses a cylinder lock with a housing (20) with a cylindrical bore, a rotor (21) rotatably mounted in the bore, a plurality of locking bars (23) on the rotor, where each locking bar has a locking bar pin (61) directed radially inward towards the axis of the rotor, and each locking bar is displaceable on the rotor in a direction parallel with the axis and each locking bar is displaceable in a radial direction with respect to the axis. However, Keefer does not have a combination post that is engageable with the locking bar pins.

Other references of record do not disclose tumblers that are movable parallel to the plug, and radially, as well as having a pin that moves radially thereof.

Art Unit: 3673

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to lock cylinder with tumblers that are movable parallel and/ or radially to the plug:

U.S. Patent Number 7,162,900 to Lu, U.S. Patent Number 7,150,168 to Kuo, U.S. Patent Number 6,718,808 to Yu, U.S. Patent Number 6,644,078 to Hung, U.S. Patent Number 5,402,660 to Osada, U.S. Patent Number 5,351,514 to Recio, U.S. Patent Number 4,622,834 to Hughes, U.S. Patent Number 4,012,931 to Harunari, U.S. Patent Number 3,648,492 to Walters et al., U.S. Patent Application Publication Number 2004/0231379 to Yu.
